

Safety Tip of the Week

Fire Safety Tip for the week of October 4, 2010

Anytown Fire Department says....

Smoke alarms save lives!

Smoke alarms are an important part of a home fire escape plan. Everyone needs to know the sounds of the smoke alarm and how to escape safely if the smoke alarm goes off. Be sure to have working smoke alarms in your home and to plan and practice your fire escape plan with your family.

If you need assistance with installing your smoke alarms, please contact the Anytown Fire Department at **(123) 456-7890** to set up a home survey.
